Curriculum & Pedagogy

SIIS follows the best practices of CBSE and Cambridge Curriculum that is stimulating and creative which emphasizes on trans-disciplinary education through an inquiry-based approach to learning. The curriculum encourages children to ask questions, plan investigations, explore various outcomes, and reach credible and logical conclusions, with teachers as facilitators. The programmes are philosophically aligned and consistent in their pedagogical approach. The curriculum is based on the concept of multiple intelligences. The educational programmes at the SIIS focus on inculcating in the learner five key attributes: creativity and innovation, collaboration, leadership, global citizenship and life-long learning. All the elements in our curriculum model converge to bring out the best in every child and enable them to be on the path of continuous development and progress.

Welcome to Cambridge International

- As Cambridge Assessment International Education school (CAIE), SIIS prepare school students for life, helping them develop an informed curiosity and a lasting passion for learning.
- Cambridge Pathway gives students a clear path for educational success from ages 5 to 19 and helps them develop the skills they need to achieve at school, university and work.
- Each of the four stages builds on learners' development from the previous one, leading seamlessly from primary to secondary and pre-university years – but they are also available separately.
- CAIE's approach helps learners to become confident, responsible, reflective, innovative and engaged. The curriculum sets clear learning objectives and focuses on developing knowledge and skills, giving learners strong foundation for next stage of education.
